

Dieu Eclat™

Fashion
**meets
health
protection**

You may copy our mask's appearance, but you can't copy our unique internal technology: 99.9% anti-bacterial rate, 99.9% UV block rate, waterproof, quick-dry etc. More than 120 different designs readily available ... plus your own! Against Corona virus, you'd better fight with Dieu Eclat!

Dieu Eclat™

The Dieu Eclat mask has been developed in a situation where there is still a global lack of appropriate masks to effectively protect users from the virus ... while making a fashion statement at the same time.

Dieu Eclat produces reusable day-to-day masks that can be hand-washed up to 30 times without losing their protective properties. This to protect mother nature from safety gear waste. The environmentally friendly material employs nano silver technology which ensures its anti-bacterial rate of 99.9% and effectively blocks UV light by 99.9%. What's more, the fabric has a deodorizing effect.

Other masks may look like ours, but they don't have our original internal technology and can't protect you like Dieu Eclat.

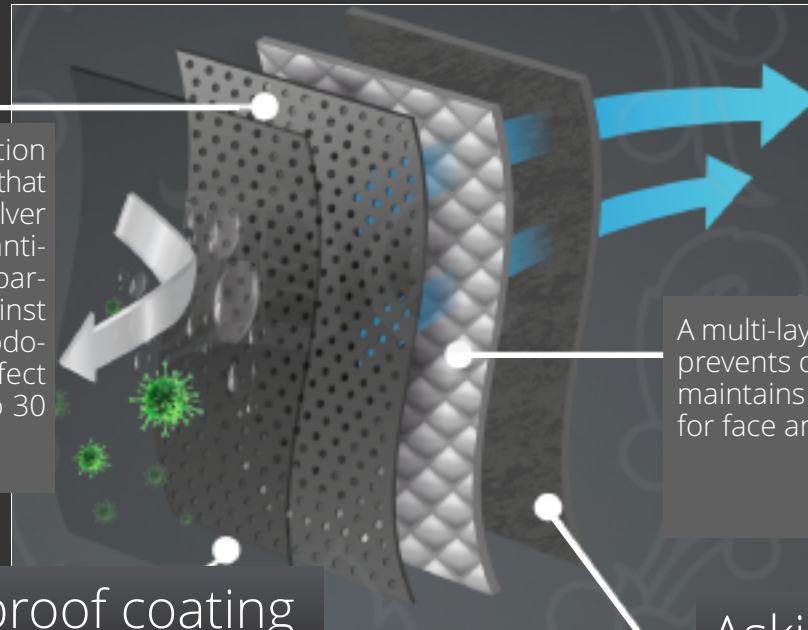

Dieu Eclat™

Technical details. 4 Layers Nano Silver Filtering

Aerosilver P

According to the US Environment Protection Agency EPA, among all natural substances that can kill viruses and harmful bacteria, silver shows the greatest impact in terms of anti-bacterial rate. Dieu Eclat masks use silver particles to ensure maximum protection against viruses while simultaneously having a deodorizing effect. The strong anti-bacterial effect remains even when (hand-) washed up to 30 times.

A multi-layer air cushion increases adhesion to the face and prevents dust and harmful substances from penetrating. It maintains a perfect 3D fit and ensures maximum comfort for face and ears even when worn for a long time.

Premium Air Cushion

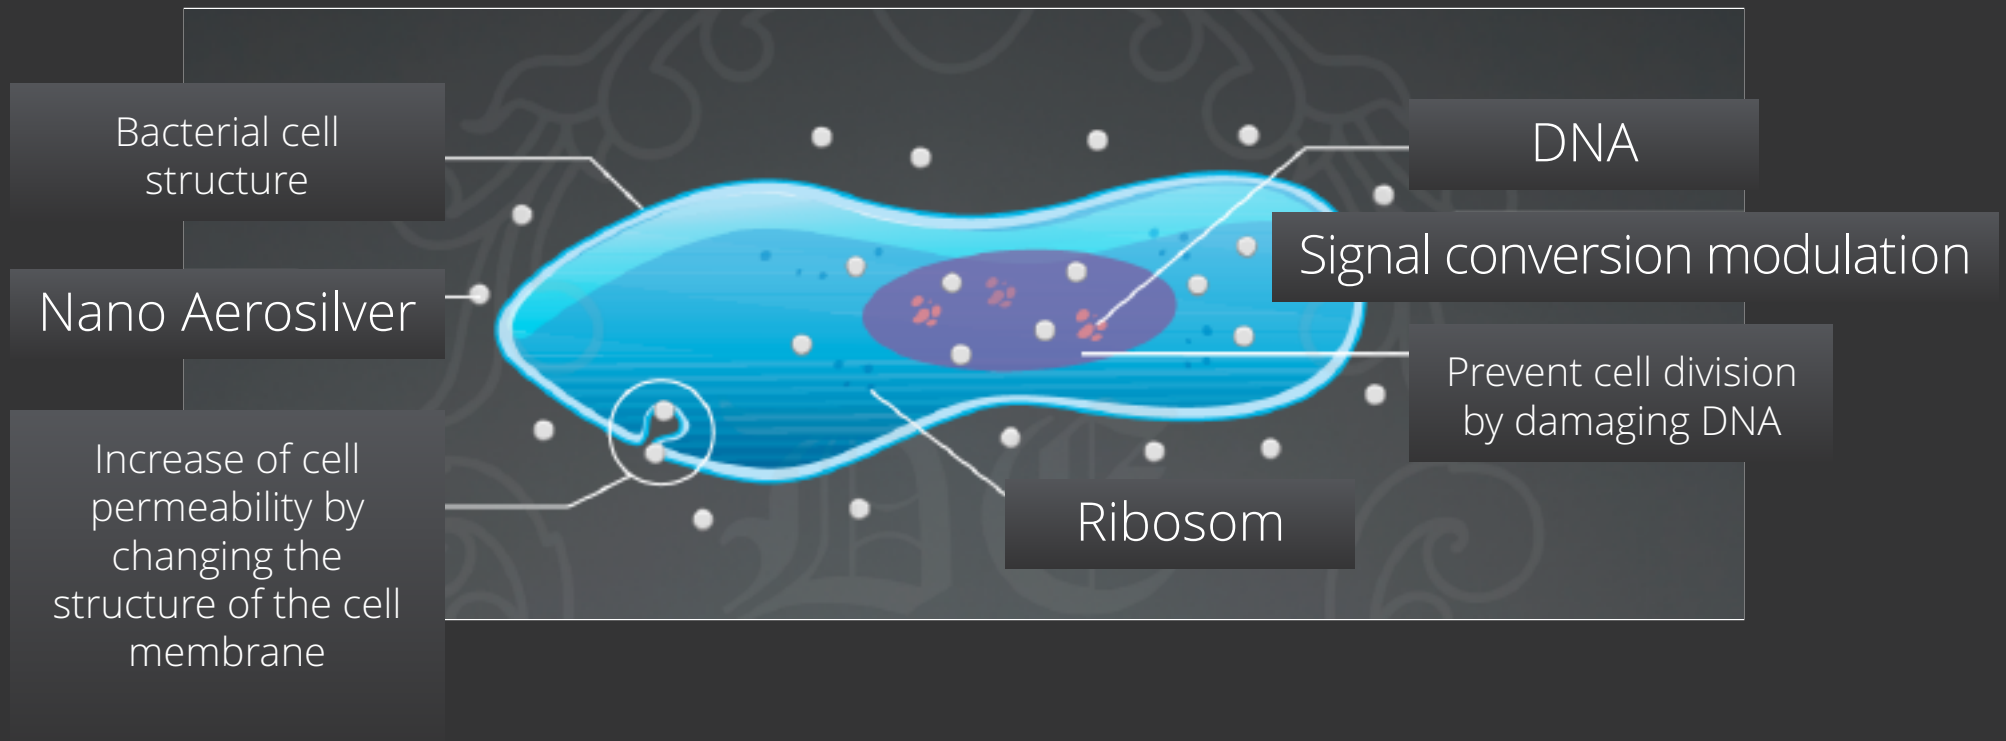

Special Nano waterproof coating

Waterproof and oilproof, Dieu Eclat masks feature an innovative anti-contamination technology with invisible tiny particles that stick to the fabric. This protects the user from other people's saliva.

Askin Cooling Properties

The world's only semi-permanent cool polyester fabric provides a welcome cooling effect while blocking UV-A and UV-B rays.

Technical details. Aerosilver

Dieu Eclat™

Technical details

It's absolutely unique: the semi-permanent cool polyester fabric provides excellent contact cooling, blocks UV rays and causes no irritation to the skin.

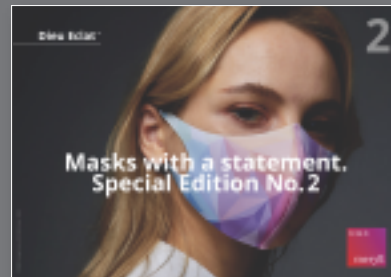

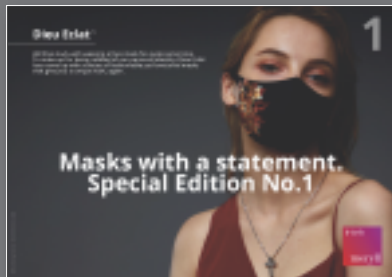

Dieu Eclat™
